REACH Declaration

New European Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) has entered into force.

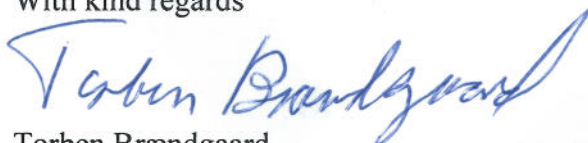

One of the requirements of REACH is that manufacturers and importers have the duty to register chemical substances that they produce or import in quantities over 1 ton per year. Another requirement is to inform customers if we have substances from the candidate list in a concentration above 0.1% (w/w) in our products. A third requirement is not to use substances from annex XVII.

GRUNDFOS has a high global standard for human health and environmental awareness, and we declare that all our products comply with the requirements in REACH.

As regards Substances of Very High Concern (SVHC) Grundfos aims higher than the requirements in REACH. We will strive to substitute all substances from the candidate list in force at any time that are found in our products or packaging materials in a concentration above 0.1% (w/w).

The GRUNDFOS policy is to be fully compliant with the REACH legislation and to work closely with suppliers and customers. This declaration is part of our policy to keep our customers fully informed about our REACH commitment.

With kind regards

Torben Brændgaard
