

GT-Tanks

End-of-Life Information

Grundfos GT pressure tanks must be disposed of according to local regulations by using a public or private waste collection service. If this is not possible, contact the nearest Grundfos company or service workshop.

Safety Risk

- Safety related to materials used
There is no risk for people during the disassembly process posed by the materials used for the product.
- Safety related for handling the product
There is no risk for people when handling the product.

Disassembly of the Product

The main materials of the components are:

- Iron
- Butyl rubber

and can therefore be recycled to a large extent – depending on the national possibilities for recycling.

The tanks cannot be disassembled with standard tools as they are welded. A saw might be of help here.

Before opening a tank make sure that:

- The system pressure has been removed and
- The precharge pressure in the tank has been removed by opening the air valve

Designation	Name	Material	Special Disassembly Consideration
-	Tank	Iron	
-	Diaphragm	Butyl	
Additional materials:		Various materials less than 5% of weight.
