

ALPHA SELECTION GUIDE

ALPHA 1 L
THE SOLID
CHOICE

ALPHA 2
THE EFFICIENT
CHOICE

ALPHA 3
THE INTELLIGENT
CHOICE

<p>Grundfos GO Remote allows you to monitor and control the ALPHA pump on-site. Valuable time is saved on commissioning and data collection is made simple, allowing you to keep your customers fully informed from installation to implementation.</p>			●
<p>Grundfos GO Balance offers easy, flow-based hydronic balancing. A balanced system means heat is evenly distributed. This maximises homeowner comfort, increases efficiency, and reduces heating bills.</p>		●	●
<p>The Grundfos AUTOADAPT function continuously adjusts to find the optimal setting for smooth and efficient operation, making the commissioning process easier and reducing the chance of a call back. Pumps in AUTOADAPT mode reduce energy consumption and increase comfort for the homeowner.</p>		●	●
<p>Dry-running protection ensures the pump will never run without liquid in the system.</p>		●	●
<p>With a noise level at or below 29 dB(A), the sound emitted by ALPHA pumps, is quieter than a whisper at 30dB(A).*</p>	●	●	●
<p>With Boiler pump replacement, almost every heating installation equipped with a Grundfos pump can be replaced like for like, saving you time and effort during installation.</p>	●
