

## Benefits summary

This document summarises the main benefits of Grundfos water well solutions.

### 3" and 4" solutions

To meet all your water well pump needs, Grundfos offers a wide range of 3" and 4" solutions.

### All-in-one design

The SQE's all-in-one design, with all components coming in a single box, simplifies installation and commissioning.

### Advanced motor features

Innovative motors are equipped with advanced features such as soft-start and dry-run, overload and overvoltage protection (SQ and SQE only).

### 3" constant pressure

The 3" Grundfos SQE always delivers the same pressure to all outlets – no matter how many family members are consuming water.

### 4" constant pressure option

In some markets, the 4" Grundfos SP and SPA can be enhanced to provide constant pressure performance via the new CU331SP control unit.

### One control unit for all sizes

The CU301 control unit fits all pump sizes, minimising shelf space needs.
