

End-of-Life Information

This document is intended for treatment and recycling facilities and provides information on components, materials, handling, and dismantling of the product when it reaches the end of its life, to facilitate correct and environmentally sound treatment.

Grundfos IO243 must be disposed of in accordance with local regulations, using authorized WEEE collectors and designated collection points. If these are not available, please contact the nearest Grundfos company or service workshop.

Safety risk

- **Safety risk related to materials used.**

The product, being an electrical equipment, contains materials and substances that may be hazardous and pose risks to the environment if it becomes waste and is not handled correctly. Please refer to the [EU's SCIP database](#) and the REACH SVHC Content lookup tool via this [link](#) to find the SVHC content present in the product.

- **Safety risk related to handling the product.**

There is no immediate safety risk when handling the product.

Disassembly of the product

The main materials of the components are:

- Polymeric housing
- Printed circuit boards

The product can be dismantled with a Torx plus T10 equipped screwdriver.

Pos.	Designation	Material
1	Terminal box bottom	Polyphenylene ether and polystyrene
2	Printed circuit board	Fiberglass epoxy laminate
3	Socket board stacker	Copper + polyester
4	Printed circuit board	Fiberglass epoxy laminate
5	Terminal box cover	Polyphenylene ether and polystyrene
6	Nameplate	Polyester film
7	Cover foil	Polycarbonate film
8	Screws	Steel
